Program Overview

About Simnet Startup Manager

Simnet Startup Manager is a utility that will help you to manage startup programs. Many programs start automatically with windows startup without your knowledge.

Removing unnecessary startup programs reduces boot time of the windows, regains valuable memory and enhances the system performance.

Key Benefits:

- Helps you to detect unnecessary and harmful startup programs with owned Process Database.
- Reduces the resource requirements of the system by preventing unnecessary programs at windows startup.

Features:

- Automatically product update.
- Smart and easy-to-use interface.
- Minimal installation, low memory and cpu usage.
